

NG (Next Generation) Twin Star at Gill Aviation

DA42 Twin Star Next Generation at Gill Aviation.

Aircrafts is equipped with the new Austro Engines AE300, delivering 170 HP.

The AE300 leaves an excellent impression. It is powerful and economical at the same time. The new DA42 NG represents a definite improvement over the previous version. All these new facts make the DA42 with AE300 a great choice for individual owners, as well as for flight schools looking to add modern appeal and technology to their flight line.
